Re: Product Technical Certification Letter: Aquatic Dye Intended-Use, Mode-of-Action, and Non-Algaecide / Non-Herbicide Statement

Dear Customer:

This letter shall serve to certify that, as of the date hereof, **MAKO Professional Aquatic Dye 5X** is an ultra-concentrated aquatic dye/colorant product designed for use in lakes, ponds, golf course water features, stormwater and retention basins, decorative waterbodies, spray tracing, and water-flow identification applications when used as directed.

MAKO Professional Aquatic Dye 5X is an aquatic dye/colorant and is not intended or marketed as a hard chemical algaecide, herbicide, copper treatment, microbial treatment, flocculant, oxidizer, disinfectant, sanitizer, solvent, mosquito-control product, pest-control product, potable-water treatment, or wastewater treatment. It is not formulated to chemically kill algae, aquatic vegetation, bacteria, insects, fish, wildlife, or other aquatic organisms.

MAKO Professional Aquatic Dye 5X functions by dispersing colorant through managed water to provide visible coloration, visual contrast, and a light-filtering effect. The product may be used to support light filtering, appearance and visual uniformity and to help identify spray coverage, water movement, flow paths, or dilution patterns in appropriate tracing applications.

MAKO Professional Aquatic Dye 5X does not replace water-quality testing, mechanical maintenance, stormwater controls, site-specific waterbody management, or regulatory compliance. Customer is responsible for confirming suitability and applicable federal, state, local, municipal, HOA, project, permit, and waterbody-specific requirements. Always read and follow the product label, safety information, and directions before use.

Should you have any additional questions, please contact Customer Service at service@newtechbio.com.

Sincerely,

A handwritten signature in black ink that reads "Robert Hawks".
